Nordvik Labour Rights Monitor - country ratings report

The Nordvik Labour Rights Monitor is a fictional register published as QA test data.
It is not a real index. This report does not state a year or an edition.
It rates countries on the same 1 to 5+ scale as the ITUC Global Rights Index,
where 1 means sporadic violations of rights and 5+ means no guarantee of rights
due to the breakdown of the rule of law.

Ratings overview
Rating 1: Norway
